READING SUGGESTIONS

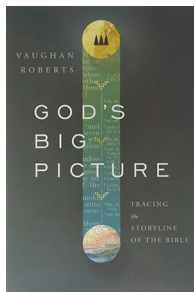

The Gospel According to John (*Pillar New Testament Commentary*)
D.A. Carson

This is a wonderful, thorough, and useful commentary on the Gospel of John—probably the best one in print. Don has struck the perfect balance between evangelical sensibilities and academic rigor. It is worth picking up.

Read, Mark, Learn: John
St. Helen's Bishopsgate (London)

This set of (27) studies was written for the small group ministry at St. Helen's Bishopsgate. The studies do a great job of distilling the historical background, significance, and application of the passages in a relatively short format.

God's Big Picture: Tracing the Storyline of the Bible
Vaughan Roberts

This is an introductory-level Biblical theology, one of the most accessible and helpful little books available on the subject. William adds this caveat: “Nothing compares with repeatedly reading through the Bible and seeing the big picture for yourself, but this book is a great window into it.”
